Abstract (en)

[origin: WO9814748A1] Mine-disposal assembly composed of a conveyance, preferably a lorry (1) and a conveyance-independent mine-disposal unit consisting of a service workplace (2) with a remote controller (21) and of a mobile fully-hydraulic mine-disposal machine (3) with a receiver (31). The mine-disposal machine (3) without any service staff is furnished with mine-activating equipment (4) in the front. The mobility, revolving of mine-activating flails and the other auxiliary functions are remote-controlled from the distant service workplace (2) means of the radio signals (213). The front of the mine-disposal machine (3) is protected by a protective shield (6).
