Abstract (en)

[origin: EP0930043A2] The vacuum cleaner has at least one operating element (1) provided at the vacuum cleaner housing (4) and a light indicator which signals a determined operating condition. At least one light wave conductor (26) is integrated in the operating element. One end of which is led out at the surface (27) of the operating element. One end of which is led out at the surface (27) of the operating element and the other end of which is positioned inside the vacuum cleaner housing (4) at a light source (24), at a place (25) lying opposite from the body of the operating element.
