Abstract (en)
A sunscreen composition containing a UV-A dibenzoylmethane derivative, such as 4-(1,1-dimethylethyl)-4'-methoxydibenzoylmethane (PARSOL TM 1789), and a stabilizer/solubilizer for the dibenzoylmethane derivative having formula (I): <CHEM> wherein m = 5, 7, 9 or mixtures and n = 4, 6, 8 or mixtures. These long branched chain alkyl salicylates having a C4<+> branch at the 2 position are quite effective in stabilizing the dibenzoylmethane derivative UV-B filter compounds making them more effective; effective for longer periods of time.
