Abstract (en)

The shoe-holder or locking units on the binding-side co-operate with counter-locking parts (6) on both sides of the shoe (3). The counter-locking parts, in relation to a side view of the shoe, occupy a rear position in relation to a middle part between the heel and the ball of the foot and are positioned on a heel-side structured part (7) of the shoe. The shoe part (12) has a flexible sole in front of the counter-locking parts. The shoe also has an ankle-support (9).

Abstract (de)

Durch die Bindung wird ein steifer Fersenbereich (7) des Schuhs (3) am Snowboard fixiert. Dieser Fersenbereich kann mit einer festen Wadenstütze (9) kombiniert sein. Im übrigen ist der Schuh flexibel ausgebildet. <IMAGE>
