Abstract (en)  
A dispenser (1) for dispensing individual tissues contained in a package, the dispenser comprising a base member (3) for attaching on a surface of the package and being formed with an opening (5) fitted for surrounding an opening formed in the package, and a lid (7) fitted for re-closing the opening of the base member. The base member is fitted with one or two firm but resilient flaps (9) extending into the opening and lying substantially in the plane thereof, and a tissue-dispensing opening adapted for extracting therethrough only a single tissues at a time. <IMAGE>
