Abstract (en)
[origin: EP0930391A1] A fabric shearing machine, having one or more shearing units, provided with a shearing drum (2) having shearing blades (4) equipped with first cutting edges (6) which respectively describe one same cylindrical path (8); a sheet (10) having a second cutting edge which makes contact with the first cutting edges (6) in operation; a table (14) having a surface for guiding the fabric (12) up to an area (16) in close proximity to the second cutting edge and lubricating means for lubricating said first cutting edges (6) and said second cutting edge, comprising a fibrous member (20) impregnable with a fatty fluid and adapted to remain in contact with said shearing blades (4). At least four fifths by volume of said fibrous member (20) are situated at a level below the level at which said area (16) in close proximity to said second cutting edge is situated.
