Abstract (en)
[origin: EP0930399A2] The concrete paving stone set has paving stones (G,L) especially for laying on curved lines. The paving stones are in sizes with a constant length difference (X) of 2-6 mm, to allow for the different radii at the outside and inside of a curved laying. The stones are formed as short lengths (G1,K1), long lengths (G2,K2) and extension lengths (G3,K3), for laying curved paths of different lengths and curvatures.
