Abstract (en)
A method for processing a silver halide photographic light-sensitive material with a processing solution, wherein said processing solution is supplied on a surface of said silver halide photographic light-sensitive material which is transferred in a gaseous phase to be processed and said silver halide photographic light-sensitive material possesses the following compositions; a support having thereon a first layer and a second layer opposite to said first layer, an emulsion layer containing a light-sensitive silver halide and an organic contrast accelerating agent which is coated on the same side as said first layer on said support.
