Abstract (en)

[origin: EP0930597A2] The pocket (14) at least on a part of its periphery is open. Practically over the whole length of one long side and/or over at least the half of its peripheral length, the pocket is open. It is also open over practically the complete length of its narrow side. The pocket has a closure of adhesive foil, which adheres in a closed manner to the rear side of the adhesion foil (10). The adhesion foil and/or the sheet material (12) are/is of transparent material. The adhesion foil as layer material is provided with sheet material-side support layer (16) of polyester foil preventing softening.
