Abstract (en)

[origin: DE19801896C1] The appliance plug is formed as a unit with the injection moulded plug bridge connected to the end of the appliance cable. The plug bridge is formed of a shape stable insulating body for receiving and fixing the electrical connection pins, and an electric fuse. The latter is mounted, via spring clamps into a receptacle formed in the bridge. At least one locating block (55) is provided so that the fuse (50) can be accurately positioned on the base of the receptacle chamber (14).
