Abstract (en)

[origin: WO9815615A1] The present invention relates, in general, to thymic microenvironment and, in particular, to a method of producing a thymic microenvironment. The invention further relates to a method of treating congenital and acquired immunodeficiencies using a thymic microenvironment produced in vitro. Included in acquired immunodeficiencies are syndromes seen in malignant and autoimmune diseases as well as traditional T cell immunodeficiency diseases such as occurs in AIDS.
