Abstract (en)

[origin: DE19640213C1] Storage assembly comprising a capacitor arrangement (4) and a transistor arrangement (2), which are self-aligned and so assembled that in each case a first contact (10) of a transistor (8) belonging to the transistor arrangement (2) is connected to a second contact (12) of a storage capacitor (15) belonging to the capacitor arrangement (4). The second contacts are designed to protrude in order to align both arrangements (2,4) and engage in a structure with elevations (20) when assembled.
