Abstract (en)

[origin: EP0931626A1] The fixing tool, comprising a gas-propelled piston (6) inside a cylinder (5), a combustion chamber (3) and sleeve (4), and a plug guide (8), has pusher (30) and thrust (29) surfaces on the plug guide and sleeve respectively. The pusher and thrust surfaces are designed to meet on a rearward movement to close the combustion chamber, and separate on the recoil to ensure that the guide is held against the support (100).
