Abstract (en)
[origin: EP0931627A2] The magazine strip has a flat narrow band with several longitudinally spaced out locators (2) for the objects. Engagement devices eg formed by notches (8) in at least one side edge (5) of the band engage a transport device of the apparatus for feeding the band into the apparatus which is to use the objects. A guide strip in the area of a long edge of the band projects opposite a flat side of the band. The locators have tubes (4) formed on the flat side of the band.
