Abstract (en)
This invention relates to a machine 10, such as a card operated self service terminal (SST) capable of dispensing media such as tickets or receipts, or prepaid cards; the SST may be an ATM which dispenses banknotes. The machine (10) comprises a user interface means (16) and a media transporter (T) for transporting media from a media dispensing point (29) along a media path (P) to a media presentation point. The media transporter (T) comprises a variable length belt feed means (40) which is adjustable between a first retracted position in which the media presentation point is adjacent the media dispensing point (29) and a second protracted position in which the media presentation point is displaced from the media dispensing point (29). <IMAGE> <IMAGE>
