Abstract (en)  
[origin: US6153994A] PCT No. PCT/FR97/01864 Sec. 371 Date May 6, 1999 Sec. 102(e) Date May 6, 1999 PCT Filed Oct. 17, 1997 PCT Pub. No. WO98/18119 PCT Pub. Date Apr. 30, 1998A control console comprising at least one member (1) for adjusting the level of radio-electric signals capable of taking up any position between two extreme positions, elements for detecting the instantaneous position of the member and elements for memorizing at least one position of the member. This console is characterized in that each adjusting member is provided with both motor mechanism for automatically positioning the adjusting member in its memorized position corresponding to a status of adjustment selected by the user and tactile elements for signalling the deviation ratio of the adjusting member relative to its predetermined memorized position. The invention is useful for mixing or lighting consoles.
