Abstract (en)  
[origin: WO9823055A1] The invention is a system for interfacing (200) a GR-303 system (220, 222) with a broadband system (BROADBAND NETWORK). The broadband system can be an ATM system. The invention can process (360) the GR-303 signaling to select ATM connections and then interwork the GR-303 connections with the selected ATM connections. The invention can interwork (362) GR-303 signaling and SS7 signaling. The invention can also process SS7 signaling to select GR-303 connections and then interwork ATM connections with the selected GR-303 connections.
