Abstract (en)
The mobile shopping bag which is also disposable, comprises a handy aid to food, drugs, etc. purchase. The plastics or textile paper or cardboard bag incorporates or has fixed to the bottom (2) of it a platform (3) with rollers or casters, for movement along the ground. The bag can have a 25-35 mm long bottom slit and can be folded, while a hole (5) near to top of it serves as a handle, the surrounding area (6) being reinforced or folded over to this effect, or else a set of handles proper can be fitted. The bag obviates the need for multiple carrier bags which are heavy, difficult to carry and a hazard to health.

Abstract (fr)
The mobile bag for shopping comprises a plastic bag (figure 1), made of textile, paper or cardboard material having adhered, introduced or coupled to its base a platform (3) with rollers or casters, providing for its displacement on the floor. At the base of the bag (2), a fold or slit can be made according to the needs in order to deposit food or products with greater facility. The platform can optionally be foldable (4), have at the top part (5) an opening for introducing the hand, said top part acting as a handle, the area (6) optionally having a reinforcement for the bag and which may be folded part or which may be adhered reinforced material, although the bags can be made simply with handles.
