Abstract (en)
[origin: EP0933044A2] The toothbrush (18) has a contact face (23), which operates the dosing pump (10,12,13) of the toothpaste container (1). The contact face is positioned on the same side as the brush head (17). A support face (25) on the opposite side acts with a support face (27) on the container. The container has an elastically deformable neck (14) with a dispenser aperture (5), and the brush is hingeably fastened to the neck. The container has a membrane for the membrane dosing pump, which acts with the contact face on the brush.
