Abstract (en)  
[origin: EP0933047A2] The furniture has a base frame (2) with a rotatably linked back-rest (3) with a telescopic carrying carriage (4) with position elements, and formed on a seat frame. (5). The rotating motion of the back rest is coupled to the movement of the carriage. One position element (12) of the base frame is associated with a further position element (7) of the carriage. There is a knee joint arrangement (12) with a twin-arm turning lever (13) in the front section of the position element on the base-frame side, and which is connected, below a lever arm (16), with the back rest via a transmission lever (17).
