Abstract (en)

[origin: EP0933168A2] The device consists of a semi-shell (1) holding two end position inquiry elements (2). The semi-shell is formed from a head part and a connection part, which are connected via releasable connection elements. It has connection and locking parts (17,21) for the workpiece clamp device head. The connection elements are located on an intermediate part. The semi-shell is fitted into a gap formed by an aperture in the clamp head.
