Abstract (en)
[origin: EP0933200A1] The printing machine has one or more pairs of cylinders consisting of a forme cylinder (1,2) and transfer cylinder. The forme cylinder (1,2) can be fitted in the circumferential direction with one and in the longitudinal direction with at least four standing printing sides in the broadsheet format and this forme cylinder can also be fitted selectively with horizontal printing sides in tabloid format or standing or horizontal printing sides in letterpress format by means of flexible printing plates (12.1 to 12.4). The circumference of the transfer cylinder (3,4) and the circumference of the impression cylinder (8,9) each amount to a whole number multiple relative to the circumference of the forme cylinder (1,2)
