Abstract (en)

[origin: EP0933484A2] The connector has a connecting shackle (2) with two ribbed metal rod sections (21) set side by side and welded together with mutual spacing by using at least two perforated plates (22). The metal rod sections form a curved end section (23) at one end. The perforated plates each have one larger hole for screwing in a fastening screw and one smaller hole (7) for hammering in a fixing pin.
