Abstract (en)
[origin: EP0933491A2] The flexible awning material is wound up on a main winding shaft (14) which is set alongside a side winding shaft (27) which stands under the action of a rotary spring (29) and is used for the side cover material (12) whose free front edge (32) is fixed on a side projection (33) of the edging strip (18). The free front edge (32) of the side cover can be fixed indirectly with a draw means (34) on the projection of the edging strip. The rotary spring is preferably a coil bending spring.
