Abstract (en)

[origin: DE19755613A1] The gearbox has an outer cone synchromesh (20) with a predetermined number of lobes (22). The lobe inner surfaces are coaxial parallel to the synchromesh ring longitudinal axis (30). The synchromesh springs (28) are retained on the selector wheel (12) by a mechanical arrangement (46). The synchromesh ring is moved by an arrangement (34) which retains it on a sliding bush (16).
