Abstract (en)
The waveguide emitter has a circular guide section (3) and a short circuit wall (2). A coaxial supply (4) is formed in the base and an opening (5) is formed in the wall together with a capacitive probe (6) that has a connection (7) with the centre conductor of the supply. A short circuit bracket (10) is symmetrical about the main axis (A) and is connected to a second probe (9). The probes provide the coupling system for the polarisation direction.

Abstract (de)
Die Erfindung betrifft eine Antenne mit zwei orthogonalen Einspeisungen aus koaxialen Leitern in einen runden oder quadratischen Hohlleiterstrahler. <IMAGE>
