Abstract (en)
[origin: WO9816096A1] A lawn mower comprising a body (2), a cutting unit including a motor (3) and rotors (4-6) which are rotatably mounted in said body (2), each about its essentially vertical shaft and being driven by the motor (3), and wheels (7a, 7b, 8a, 8b) for supporting said body (2). At least one of the rotors (4, 5) forms a rotary unit together with one of the wheels (7a, 7b) that is mounted centrally underneath the rotor (4, 5). The rotational axis (12) of the wheel (7a, 7b) of each rotary unit forms an acute angle (ω) with the rotational axis (13) of the rotor (4, 5).
