Abstract (en)

The invention relates to a displaceable lift (1) for upward transporting along a building to a storey of the building of material required in construction or maintenance, such as an assembly of a window frame and a glass pane, while the lift is in stationary position or in fixed position, comprising: a displaceable frame (2); an elongate mast (3) on the frame; and an up and downward displaceable carriage (4) on the mast for transporting the material. <IMAGE>
