Abstract (en)

[origin: FR2767772A1] The invention concerns a support parking device with anti-theft system for two-wheeled motor vehicles locking together the whole vehicle and whereof the use requires only a standard anti-theft device. It consists of a slide-post (1) provided with a plate (2) for receiving locking holes (3) arranged to be adapted to all heights and degrees of inclination of parked vehicles. A locking arm (5) provided with a support part (8), articulated on (7) connected to a part (6) slides on the post (1). Said arm (5) provided with holes (10) which, co-operating with the holes (3) via the anti-theft device (11) lock the vehicle on the ground. The chain (16) locks the vehicle elements after it has been locked on the anti-theft device.
