Abstract (en)
[origin: WO9819904A2] A windshield assembly (1) comprises a flexible substantially transparent shield (2) releasably engageable with a frame (3) which can be fixed to supports (4) protruding from the steering part of a motorcycle (5). The shield (2) comprises a central sheet portion (10) and two wings (11) folding to form a panel which can be rolled up (14). The shield (2) comprises a plurality of pockets (15) in which sticks (20, 21) pivotally connected to supporting arms (23) of the frame (3) can engage. The arms (23) have hooks (24) engageable in other pockets (16). The arms (23) are connected by two pivotal rods (25) pivoted to each other. The frame (3) can be folded and packed very easily and can be put in a small bag (30) along with the rolled shield (14) and stored, for example, under the seat of the motorcycle (5).
