Abstract (en)  
[origin: US6099157A] A vehicle headlight comprises a light source positioned at a focal area of a reflector. A lens is positioned in front of the reflector, and a screen is placed between the reflector and the lens. The screen is formed as an elastic bowed part having a bowed edge for creating a light-dark border of a light pattern, and is connected and held at its free ends to a frame by latch elements engaging into latch openings.
