Abstract (en)
[origin: EP0936041A2] The underneath base ring (22) remains with the newly finished concrete parts (10,20) for removing the concrete parts from the mold. The newly completed concrete parts are stacked vertically (30) on a base surface and removed to a storage place after a setting period. The second newly completed concrete part (20) is stacked on top of the first newly set concrete part (10). The concrete arts stacked on the lowest concrete parts are support especially by feet (23) on the top support surface (18) of the end ring (12) belonging to the concrete part underneath it.
