Abstract (en)

[origin: EP0936299A2] Essential oil containing cedar's aromatic component is impregnated into natural fibres or textile materials woven using at least some portion of natural fibres. The essential oil may also be mixed into synthetic fibres and textile materials woven using at least some portion synthetic fibres. The fibres and textile products made according to this invention exhibit powerful insecticidal properties and exert an aromatherapeutic effect while adding little to the costs of production.
