Abstract (en)
[origin: WO9819913A2] A pressing station assembly for a small-scale blister packing apparatus comprising upper and lower pressing plates, one or both of which are moveable between a rest position and a pressing position, the pressing plates securely supporting upper and lower tools respectively, wherein one or both of the tools are adapted to be secured to the or each respective pressing plate using a quick release attachment means, is described. The tool(s) are preferably attached to the pressing plate(s) using a tool attachment means, moveable between open and closed positions. Guidance means assist alignment and levelling of the tool(s). A small-scale blister packing apparatus comprising a blister roll supporting apparatus, blister roll guidance means, and a blister pack pressing station assembly as herein defined is also described.
