Abstract (en)

[origin: WO9912838A1] The invention concerns a waterproof and flexible bag for suspension load test, comprising a waterproof envelope (1) supported by evenly distributed straps (2) each of which has a top end designed to be linked with means for hanging the bag and its other end, so-called lower, linked to a connecting ring (3) common to all the straps and arranged beneath the bag while means for emptying the bag are provided. Said bag is characterised in that the emptying and/or filling means comprise at least two mutually fixed parts (5a, 5b) and arranged inside and outside the bag respectively, while a housing is provided in one (5b) of the two parts for receiving the connecting ring (3) of said straps and at least one emptying and/or filling conduit (10) passes right through the two parts (5a, 5b) and the envelope (1) to open inside the bag and outwards by means of a stop valve (11).
