Abstract (en)
[origin: WO9820227A1] The invention concerns a coupling device (3) for the operational connection of crank handles to drive devices for awning drums. The coupling device (3) comprises a part (11) which is in the form of a hollow body and internally has at least one recess, and into which a head, preferably a spherical head (17), which is or can be connected to the crank handle shaft, can be inserted with a corresponding projection engaging in the recess.
