Abstract (en)

[origin: EP0937583A2] The turning support has a head receiving the panels with grippers rotatably supporting the panels. The head has a drive to rotate the panels clockwise and anticlockwise. The head (10) has a drum (14) rotatably mounted on a vertical shaft (24). There is a lower disc (32) and an upper disc (34) with their outer edges having similarly spaced frames (22) each receiving a panel. The rotating drive has a positional fixed plate (26) on the head (10) with a rotary rotating star (82). The star supports rollers parallel to the axis of the drum.
