Abstract (en)
[origin: EP0937655A1] The separate containers (11,12) are open at the top and are closed by one closure piece over the whole multiple pack(10). The one closure piece comprises a multiple lid (17) inside which are separate adjacent lids (18,19) matching the number of containers and constituting re-closeable lids separated by a line (22). The containers and multiple lid are made of the same material, especially plastic and are heat-sealed by a peripheral sealing flange (16,21).
