Abstract (en)
[origin: EP0937807A1] Subjection system from the engine to the washing machine tank, being of the kind of those whose engine has some pairs of radial lugs that are endowed of a hole in which a tubular body of gum is geared for doing its fastening to the washing machine tank, since the washing machine is endowed of the respective lugs for their fixing to the corresponding radial projectings of the engine, so that the subjection system has a pair of radial lugs that are materialized in the own manufacture process of the plastic tank, so that they have an axial prolongation (2) whose external surface has a conical shape in its initial part, being the cited prolongation (2) endowed of an axial central hole (3), and the fastening means from a pair of ring-shaped lugs (4) of the engine to the cited axial prolongation (2) of the radial lugs of the tank (1). <IMAGE>
