Abstract (en)

[origin: EP0937829A1] For fixation the two components (1,7) are connectable to one another by means of a screw connection (17). They are provided with recesses (3,10) which the screw connection penetrates. The first component (1) has a recess (5) penetrable by a wall-side screw (12) fixing the wash stand. At least one of the recesses receiving the screw connection has an inner thread. The first component has a first section (2) with the recess (3) accommodating the screw connection and a second section with the recess accommodating the wall-side screw. The sections are arranged particularly at an angle of 65 degrees to each other.
