Abstract (en)
[origin: EP0937835A2] The wall has a substructure on which wall panels pushed onto each other with vertical joints. The panels have a covering on their outsides, especially wall paper. Tear strings (17) are located in the region of the vertical joints and extend over the entire height of the panels. The strings have freely reachable lower ends (18). The panels have screws (10,11) gripping lateral crossbars of the sub structure from below, penetrating a rear side of the wall panel lateral to the plane of the wall, and fixed in a lower region of the wall panel.
