Abstract (en)

A tempering, chilling and freezing room arrangement which comprises devices (1, 2, 4) for producing heat, cold air and an airflow, a ceiling (5) which is arranged to form, together with the upper part (8) of the walls and the roof (7) of the room, a suction duct (6) in which the apparatus (4) for producing the airflow and the devices (1, 2) for producing heat and cold air are arranged, the ceiling (5) comprising an opening (9) which connects the room space to the suction duct (6). The arrangement also comprises an airflow control member (10) which is arranged above the product to be treated and guides the airflow produced to the suction duct 6 through the product (11) to be treated. <IMAGE>
