Abstract (en)

[origin: EP0938103A2] The wire tension measuring device (12) is located between the conveyer (5) and cover extruder (6) and is connected via a speed control unit to the conveyer and/or haul-off unit. The length (A) of a free running section of the twisted wire (2) between the tensioning device and both the conveyer and extruder is NOTGREATER 4 times the mean twist length. Preferred Features: The length (A) of the free running section is preferably NOTGREATER 2 times the mean twist length.
