Abstract (en)

[origin: WO9821098A1] A collapsible bundling device for refuse can be collapsed for storage in a small space. The device can be mounted quickly and easily to form a stable working device and enables branches, brushwood, hedge cuttings and other elongated refuse to be easily bundled without problems with the shape and length prescribed by the municipal and communal waste removal services. Chopping and packing the chopped goods in the prescribed costly and environmentally harmful garbage bags can thus be dispensed with.
