Abstract (en)
[origin: US6095110A] PCT No. PCT/FR97/02035 Sec. 371 Date Jul. 14, 1998 Sec. 102(e) Date Jul. 14, 1998 PCT Filed Nov. 13, 1997 PCT Pub. No. WO98/21458 PCT Pub. Date May 22, 1998An internal combustion engine comprising the power take-off shaft and at least first and second crankshafts connected to the power take-off shaft by first and second linkages, respectively. The first and second linkages are each severable when their respective crankshafts are immobilized (e.g., by failure), such that the engine can continue to operated using the power from the operating crankshaft. The linkages break under a load less than or equal to a load necessary to immobilize the respective crankshafts.
