Abstract (en)
[origin: EP0938862A2] The object (I) for the cleaning of surfaces comprises a support and a cleaning layer on a least a portion of one of the surfaces of the support. The cleaning layer is a polymer layer containing embedded polymer particles (II) having a Shore D hardness of no more than 80. Independent claims are included for: (i) the production of (I) by application of a polymer dispersion containing particles (II) onto at least a portion of the surface of the support and drying and fixing the dried polymer dispersion onto the support; and (ii) a composition comprising a polymer dispersion and particles (II), preferably for the production of (I).
