Abstract (en)

[origin: EP0939177A2] The threshold, at least in the area (5) provided for the location of the beams of the vertical columns or bars I-shaped in cross-section, is formed from wooden lamellas (6) glued together with vertical fibers parallel to the axes of the columns or bars (2) accommodated by the threshold. The wooden lamellas are particularly made of spruce. The individual lamellas glued together each have a cross-section of approximately 35 x 27 mm.
