Abstract (en)

[origin: EP0939290A2] At the free end of the short tube (1) is a magazine (2) for practice ammunition (16.1). The practice ammunition has the same weight and dimensions as real ammunition and in the area of their front part have devices for engagement of a brake device (13,14) in the magazine. An ammunition removal aid is provided with removes the practice ammunition from the magazine with a frame running on rollers, which supports a work platform for operating personnel. On the platform is a hydraulically raisable and lowerable lift vehicle for accommodating the practice ammunition and lowering it to ground level.
