Abstract (en)  
[origin: EP0940105A2] A telescopic rail system for heavy pullout sections of cupboards has a U-shaped rail (2) fitted to the bottom of the fixed cupboard and an inner rail (9) fitted under the extension, while a middle rail (3) provides the pullout facility, via rollers fitted into the system. To ease the fitting of the system a T-shaped support rail (16) is fitted under the extension with a coupling fitting to the inner rail. The flat part of the profile (17) is secured under the extension while the vertical profile (18) locates between the profiles of the inner rail.
