Abstract (en)
[origin: EP0940347A1] The cardboard packaging pocket has a front (11) and rear (21) wall, linked by a folding line (111), for adhesive bonding when folded. A tongue (31), at the leading edge of the front wall (11), has a folding line (114) at the edge. A cut-out (41) in the rear wall (21) takes the inserted tongue (31). A tab (34), at the end of the tongue (31), has a nominal fracture line (331) between them so that the tab is torn free when the tongue is withdrawn on first use.
